This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE.

OWING probably to the disturbed state of the Kingdom during the great civil war, when most of the business of this country came to a standstill, the usual practice of copying into Registers, all Wills brought for Probate to the Exchequer and Prerogative Courts of York, appears to have been temporarily discontinued; and when the country settled down again to its normal condition the vast accumulation of arrears of work rendered this a task apparently too formidable to be attempted. In consequence, the Wills proved in these Courts from 1636 to 1652, inclusive, are to be found in bundles as originals or copies (for it was not unusual, at this time, to return the original to the administrator and to file a copy) and not as transcripts in Registers as at other periods. Each of the bundles, of which there are above two hundred, contains (with two exceptions) the Wills proved during the course of one month, and with respect to the month of March, it is necessary to point out that there is some confusion, owing to the mixing of Wills proved between Lady Day and the 31st March of one year, according to our present style of reckoning, with those proved between the 1st of March and Lady Day of the following year. This error has been avoided in one year by placing the first-named Wills in a separate bundle, which is labelled "Little March." It must also be borne in mind, in order to reconcile certain apparent discrepancies in the dates of Probate, that all the dates given are according to the old style of reckoning.

The bundles, as a rule, contain Wills only. In some, however, a considerable number of Administration and Tuition Bonds are also to be found. The whole of the former are included in this Index, and such of the latter as are unaccompanied by Wills or Administration Bonds. There is one bundle labelled "Testamentary and Administration Bonds for August and December, 1649," containing Bonds only, and this, at the risk of repetition, which occurs in the case of a few of the Testamentary Bonds, has been fully indexed with the Wills of that year. It is almost needless to say, that whenever the following abbreviations occur, Test. Bond, Adm. Bond, Tui. Bond, one or other of these Bonds is alluded to. The Administration Bonds here indexed, though fairly numerous in some years, do not represent a tithe of the Grants, in the case of intestates, which must be sought for in the Act Books. Therefore, this volume may be considered a complete Index of all Wills proved during the years 1636 to 1652, in the Exchequer and Prerogative Courts of York, that are known to exist (except a few fragments that have not been identified), and of all the Administration Bonds, signed during that period, that are to be found in the bundles. The total number of references given is upwards of 10,500, of which, roughly estimated, 9,700 are to Wills, and the remaining 800 to Bonds.

As the Council contemplate publishing a complete Index to the Wills in the York Registry from the earliest period, and as substantial progress has already been made with the first volume, it may seem a somewhat clumsy arrangement to issue this portion of the Index out of its proper chronological order. But as it was ready for the press, and as it covers one of the most important and interesting periods in the history of this country, no good reason can be assigned for witholding, for some years, information that many of the subscribers are most anxious to have at once.

It is only necessary further to say that the thanks of the members of the Association are due to Mr. H. A. Hudson for his kindness in permitting this Index to be commenced when the Wills were under his own immediate charge in the Diocesan

Registry. Circumstances, into which it is unnecessary to enter here, prevented the completion of it before they were removed in January, 1887, to their new home in the District Probate Registry, and rendered it necessary to apply to Sir James Hannen, for permission to continue the work; this he most kindly and promptly granted. The subsequent assistance given by Mr. Hudson, now the District Registrar, and all the other officials connected with the Registry, made its completion a most pleasing task.

May	Wilde, Henry, Greenhills in Crompton, co. Lanc.,yeo.	Sept. 7, 165[illegible]

[a] Through decay the date of this Bond is wanting. It is really of much later date than [illegible] of Administration of Wm. Tayler's estate. It refers to two previous bonds, in the first [illegible] widow is bound to administer to her husband's estate; in the second Wm. Nixon her father [illegible] to administer her will proved in London, 1657 (? 1658), and in this he is bound after her [illegible] curator to take charge of William Tayler his grandson, the son of Wm. Tayler of Thorn[illegible]

PROVED YEAR 1651-2.
